[Geovision Ccs Usb Dongle Crack](#)

<b>Two-person A/B rule</b>	<p>The door unlock only when two assigned cards are presented together. Two Person Card A must be presented before Two Person Card B.</p> <p>For settings, see <i>4.3.1 Adding a Single Card</i>.</p>
<b>IP device</b>	<p>The video device is connected to the ASManager through the network. The ASManager enables you to access the live video from not only GeoVision IP devices (GV-System, GV-NVR, GV-Video Server, GV-Compact DVR and GV-IP Camera) but also certain third-party IP cameras. Connections to IP devices through ONVIF, PSIA and RTSP protocols are also supported.</p> <p>For details, see <i>Chapter 5 Video Integration</i>.</p>
<b>Data Group</b>	<p>This feature allows the administrator to restrict a user account to only be able to read, write or execute the controllers, cards, users, access groups, time zones and weekly schedules assigned under a data group. For example, the administrator can create a data group for the sales department and assign sales department-related cards and controllers under that data group. Employees in the sales department will only have access to the cards and controllers of their own department.</p> <p>For details, see <i>7.1.1 Adding a New User</i>.</p>
<b>Door Group</b>	<p>When a large number of GV-AS Controllers are connected to the GV-ASManager, the controllers can be organized into different door groups, allowing you to quickly upload fingerprints to all the controllers in a door group instead of uploading to each controller one by one.</p> <p>For details, see <i>7.4.4 Uploading Fingerprints to Controllers Using Door Groups</i>.</p>
